What's New In Alarm For Vonage?

Alarm For Vonage is a tiny.NET Windows service that wakes you up in the morning, reminds you to feed your cat, and lets you know when it's time to go to work. Changes: \*

- \* Updated to .NET Framework 4.0
- \* New configurable ring time alarm, so you don't have to set the wake up time for Alarm For Vonage to start!

Demo 1: Read the FAQ at or download Alarm For Vonage for

---

Windows 64 bit from and for  
Windows 32 bit from You may have  
to get the .NET Framework 4.0 from  
Changes to Supported Versions: \*

- \* Version 2.2.2 added support for 2.0.6
- \* Version 2.2.1 updated to use ServiceBase
- \* Version 2.2.0 added support for .NET Framework 3.5
- \* Version 2.2.0 no longer requires the new ServiceBase.

On .NET Framework 2.0, the ServiceBase is used for registry and command line arguments. The order of the array will be checked against the order of the register names. If the order is the same, the register at the specified

---

address will be set to the specified value.
