## What is AutoCAD?

AutoCAD is a professional desktop CAD system. Using the latest technologies, AutoCAD is the best choice for: Full-feature drafting and modeling  
Rapid and accurate annotation High-quality renderings and animations Autodesk's other major software product, AutoCAD LT (formerly AutoCAD

---

Beginner), is a drafting package designed for the casual user or as a starting point for more advanced applications.

AutoCAD LT is available as a free, registered user download and as a 30-day, fully registered license for students and for the educational market.

AutoCAD has always been more than a drafting program, though. It is also a set of tools for building

---

efficient workflows. It includes software for visualization, project management, collaboration, drawing management, and many other tools. AutoCAD is bundled with AutoCAD LT as the AutoCAD Core package. In addition, AutoCAD LT includes various other third-party products as part of its add-on library. These products and tools can be used together or separately to create

---

custom, valuable workflows. AutoCAD has been available in two major versions:

AutoCAD 2000 and AutoCAD 2007. The

2020 release of

AutoCAD is AutoCAD 2020 for desktop

applications (AutoCAD LT does not receive an updated version

number). The 2020

release brings a new user interface (UI) for

AutoCAD, along with a host of new features,

---

such as multi-view, 3D and Visual FX.

AutoCAD is available as a desktop program, web app, mobile app, and cloud apps. Who is AutoCAD for?

AutoCAD is used by professionals and students to create drawings, diagrams, models, animations, and more. AutoCAD is available for a broad range of industries, including architecture, engineering,

---

construction,  
manufacturing, building,  
design, and more. The  
following are some of  
the industries where  
AutoCAD can be used

Open the Autocad product key box. Paste your product key and the company number in the box provided. Click on Generate. Check the box that says "Add your activation key to the product key" and click on OK. Q: Data value pair - number pairs to string I have the following data: A1 A2 A3 A4 B1 B2 B3 B4 C1 C2 C3 C4 I want to

---

return each pair (A, B)  
or (A, C) depending on  
what row is selected. The  
returned string will be all  
the values of each pair in  
the correct order, eg:

A1A2, A2A3, A3A4,

B1B2, B2B3, B3B4,

C1C2, C2C3, C3C4 Any

ideas? A: A VBScript

solution (assuming the

data starts at row 1 and

you want the last row):

On Error Resume Next

Dim lRowA, lRowB,

lRowC Dim sA, sB, sC

Dim aRows, bRows,

Range("A1",  
Cells(Rows.Count,  
"A").End(xlUp)) Set  
bRows = Range("B1",  
Cells(Rows.Count,  
"B").End(xlUp)) Set  
cRows = Range("C1",  
Cells(Rows.Count,  
"C").End(xlUp)) If Not  
aRows Is Nothing Then  
For Each a In aRows sA  
= a.Value If Not bRows  
Is Nothing Then For  
Each b In bRows sB =  
b.Value If sA = sB Then  
sC = sB Else
