A strong company and powerful software, Autodesk has grown steadily since the early 1980s, and currently enjoys a market capitalization of \$5.1 billion. After many years of litigation against Microsoft's rival 3-D CAD software product, AutoCAD, Autodesk reached a settlement of the suit in 2009. Tom Ryan and Joe Gareipy bought this company in 1974. They renamed it Autodesk to capitalize on the growing popularity of the word "automate."
