"Neila itches". The hag Itchevechig (or its spirit) used this riddle to try to gain immunity against being killed, but the two of them couldn't determine who deserved to be killed. Who is it that Ben-Oni didn't choose? A: Ben-Oni didn't choose any of the three because it's a riddle, and a riddle isn't simply about winning, but about the art of winning. Here, the only useful things are the four letters which could be translated to mean "whom did Ben-Oni not choose". There are six possibilities in which the first letter could be, but five of these are the same word. So, if the first letter is A, which is possible, the only four letter word that makes sense is "all". "Neila itches". The hag Itchevechig (or its spirit) used this riddle to try to gain immunity against being killed, but the two of them couldn't determine who deserved to be killed. This implies that Ben-Oni did choose the person, and we know that the correct person is Nelia. Who is it that Ben-Oni didn't choose? He chose to break the riddle by choosing only one person to be the correct answer, Nelia.
