Play your favorite tracks and cue up your favorite dance number Feature List: Each track has it's own unique fader Makes full use of modern Windows 7 & Vista effects Fits perfectly in the windows 7 explorer ribbon bar for an instant plug Makes full use of dynamic link library and DirectX9 inbuilt api Easy to use automation You can even open each track with your own cue and start the mix Special Compatible: GrooveBox is compatible with Windows 7 Windows Vista Objective: Do things right the first time! The objective of GrooveBox is to be an easy to use plug that can make your life easier. I wrote my first plugin back in 1997 and remember it was pretty hard to use (pun intended) with Windows 95. What happened over the years with the Windows API's and user interface and on the other hand GrooveBox, well I feel the the two are pretty close now. So now if you want GrooveBox to work the way you want it to feel free to email me and let me know what you want. I won't charge you to do this as the only thing I could charge you with is ripping out my programming and fixing code and that I will NOT do unless I feel I am standing on the shoulders of greatness. I just want people to get GrooveBox to do what they want it to do. GrooveBox is a simple audio plug-in that lets you play a set of tracks at the same time, in order to create the dance floor fill that sounds so good in your club mixes. The concept is very simple. All you do is set a few parameters for a set of tracks, then GrooveBox does the rest for you. Feature list Each track has it's own unique fader, you can keep it up or down, this way or this way, this one of those feels or this way etc. Makes full use of modern Windows 7 effects Fits perfectly in the windows 7 explorer ribbon bar for an instant plug Makes full use of dynamic link library and DirectX9 inbuilt api Easy to use automation You can even open each track with your own cue and start the mix Special Compatible: GrooveBox is compatible with Windows 7 Windows
