The game is still playable as you can still control your character, but meaningful progress is no longer possible for whatever reason. That's right, even though it sounds like a good strategy, you can't move your character anymore. This is because on the screen you only see three options that appear at the top of the screen. This allows you to move left, right and back. However, if you want to move your character to the left, the character you see will not move with him, instead he will be moved to the left.
