Based on the Eclipse Rich Client Platform, Doxia is built on top of the Eclipse platform to offer developers and content authors a comprehensive set of tools and libraries for creating, importing and manipulating text, images and other multimedia content. Doxia can be easily integrated in any application to provide end users with online content that is synchronized across multiple PCs. Support for different document formats, including HTML, RTF, PDF and so on, makes Doxia a powerful content management solution. With more than 50 unique features, Doxia provides a comprehensive set of tools for generating content. Developers and content authors can take advantage of a rich text editor, a structured document format, a stylesheet manager, a database engine for storing and retrieving information, and even a PDF generator for creating a version of the content that can be viewed, printed and searched. A visual editor with auto-completion The content creation and management tools in Doxia are implemented in a visual editor that provides all the features you need for text and document editing. You can freely organize a document into folders, and add descriptions and other information. The editor lets you easily manage files from different sources and integrate them into a single document. Furthermore, you can choose between text editing and WYSIWYG view. The rich text editor allows you to insert, edit and format text from many different formats. For

example, you can use the Rich Text Format (RTF) to format tables and the Visio Text Format (VTX) to format diagrams. You can insert images directly from an external source, so you don't have to use an external tool for this. Autocompletion provides fast access to useful commands, and also includes auto-completion of folder names and file names. You can also add a line break in a document by typing \r. Content creation and formatting Doxia also includes a document generator for creating web content in different formats, including HTML, XML, PDF, and so on. You can format the text using different styles, such as bold, italic and so on. The generator can also create documentation for a page, including headers, sections,

Even if you don't have any special knowledge about Linked Notes, you can use this software for a variety of purposes, such as editing your text documents, notes, quotations, etc. Linked Notes doesn't ask for much information at the beginning, so you can create and edit files right away, and enjoy the ease of use. It

comes with a variety of text documents you can use for importing and exporting text content, and this is a big plus for people who have a lot of content to keep track of. This application is more than just a text editor, because you can also select different files to edit, rearrange content, add different styles, and add numerous different tools to customize your text documents, all without touching a single code. It can even run on both tablets and desktop computers, with only a minor adjustment to the interface. The application has all the usual text editing features, so you can easily work on a variety of content, including documents and notes. In addition, it also lets you export data, with all the options you need to put your documents together in one place. Furthermore, Linked Notes allows you to customize your text documents, which allows you to save a lot of time by enabling you to customize the information you want to keep in one place. At the bottom of the interface, you have an option to create a new document and save the changes, which is one of the most convenient features of Linked Notes. Moreover, you can also choose where to save the content you want to keep, which means you can save a separate file for each one of your activities. Even though Linked Notes is a free software, it has a lot of features for people to use. If you're the type of person who likes to organize all your different content, this can help you out quite a bit. You're also provided with
