KeyMacro for Outlook is a simple application for creating shortcut macros for Outlook 2013, 2010, 2007 and 2003. Shortcuts can be created using the “Edit Keymacro” dialog. From there, you can specify the name, application path, location, arguments and shortcut menu. In the event that the macro executes, a new shortcut is created in the menu of the current window. If you wish to perform a variety of tasks using a single shortcut, Keymacro for Outlook is a useful solution.

Outlook macros are created by placing.vbs files in the Outlook's "Profiles" folder. The operation of macros depends on whether they are run as an add-in or an add-in-like. This program offers macro settings through "Edit Keymacro". It is also possible to create shortcut macros that run in a certain context. For example, the "Run macro in the next new message" option can be used to run macros automatically when a new e-mail message is received. KeyMacro for Outlook is a useful tool for creating shortcuts in Outlook that will have an impact on your work habits.
