Designed for self-employed users and everything from small to medium businesses, The Cost Estimation & Invoice Manager is a streamlined and fairly lightweight piece of software that helps you manage all financial-related aspects of your business. Straightforward when it comes to both its installation and workflow It can be deployed on your computer in

mere seconds and without requiring anything more than a few mouse clicks on your part. However, please note that in order to activate the app's 30 days trial, you need to use the provided activation key, located on the upper part of this review or the app's official webpage. The application has an oldschool approach, with a somewhat outdated

user interface and a main window that acts as a bespoke "financial" desktop. Even though it does not look quite at home on later version of Windows, we will admit that the functionality and user-accessibility are quite good. For an app mainly designed for small businesses, it's surprisingly well-equipped. The large majority of features are readily

accessible from the upper menu bar or via keyboard with the help of the F-buttons. From F2 to F8, you can access the Customers, Products, Cost Estimation Sheets, Invoices, Payments, Work Sheets, and Schedule sections. There are a couple of other sections that require a bit more mouse action on your part, such as Search, Other, Reports, and

Configuration. Some of the app's noteworthy highlights include a report manager, very handy when it comes to analyzing financial information, support for three custom taxes, an expense and appointment manager, support for up to five subwork sheets from the same invoice, and handy tricks like the ability to transfer an invoice to a

work sheet. Effortless cost estimation and efficient invoice management for your business All in all, even though it may not look the part and even though it's not exactly the best documented financial app out there, The Cost Estimation & Invoice Manager might just be the app you were looking for thanks to its interesting balance and overall

weightlessness. In the end, it all comes down to two things: whether the app packs enough features for your specific needs and if you can get over the fact that it looks a bit outdated. Description: * Instant sync of data to the cloud * All your accounting in one place * Accounts Receivable * Accounts Payable * Sales Invoice * Purchase Invoice *
