## **What's New In BizConference?**

BizConference is the largest web conferencing platform in the world. BizConference is the largest web conferencing platform in the world. BizConference is a 50,000 user company that has been providing a low cost web conferencing solution for more than 12 years. BizConference started in 1998 as a software application that can connect 6 people across a local area network. In the beginning, we only used BizConference for small staff meetings. What is a web conference? A web conference is a virtual meeting where people can participate from their computers or mobile devices. Most web conferences are internet based, and this means the content is transferred over the web and delivered to participants. Web conferences are more cost-effective than many in-person meetings because there are no hotel costs or car rentals. Web conferences are usually held on a set time, usually on a Tuesday, Wednesday or Thursday of a designated week and all participants are "on time". How do web conferences work? A web conference works by using a web conferencing platform such as BizConference. A web conference room is created, participants use their computer or mobile device to log-in, and join the conference meeting. Once the meeting is over, participants can leave the meeting, or it can continue on a daily basis. Why do I need a web conference system? While a web conference is not mandatory in order to be successful, it is a great way to improve efficiency and reach a wider range of your potential customers. Using a web conference, you can reach companies located around the world and interact with more than 100 different people at a time. The web conference room can either be set up on a regular basis, and this is done by default when you log-in using a schedule; or you can choose to only have a web conference room once, and this is done manually when you actually
