In This Chapter Recapping the Golden State Deciding what to do with your best images Compiling your greatest work Looking at the captions Reviewing and sharing your work All the techniques in the preceding chapters can help you produce more impressive pictures, but they can't guarantee success. Using the proper equipment, best angles, and the right software are only the beginning steps in achieving the results that you want. You have to produce images that are both interesting and exceptional. It's as simple as that. The following ten pictures tell the story of my visit to the state of California. The pictures were taken by me, mostly with a Canon EOS 10D, and include images that capture the beauty, glamour, and desirability of the state. One of my favorite photographs is the image of San Francisco, California, on the right in Figure 16-1. It shows the old and new buildings of the city, gorgeous sunset over the Golden Gate Bridge, and one of the biggest crowds of people I have ever seen. That's what makes this photo one of my favorites. Photos like the one of San Francisco sometimes get ignored. But if you make a picture that's really cool, it can't help but get attention. In Figure 16-2, I created the image of San Diego by using a wide-angle lens, with sun as a fill light and a semi-transparent gray paper (with the sun shining through) to control the highlights. I put the self-timer on the camera and then adjusted the exposure, causing the sky to be very dark and the stars to appear bright. The cityscape image in Figure 16-3 is a great example of using one of the camera's specialty features. The camera enables you to use a program on your computer to take

The effect of dopamine agonist bromocriptine on a cellular model of Parkinson's disease. The dopamine agonist bromocriptine has been widely used for the treatment of the parkinsonian syndrome. However, due to the untoward side effects of bromocriptine in these patients, a new drug with fewer side effects is currently being developed. The present study examines the effect of bromocriptine on the cellular model of Parkinson's disease (PC-12 cells), which was previously used for studying the protective effect of thyrotropin-releasing hormone (TRH). Bromocriptine was found to elicit changes in the structure and function of the PC-12 cells, and these were accompanied by effects on the cerebral metabolites involved in the protection of dopaminergic neurons. Pretreatment with bromocriptine (10 microM) at different times before a 24 h incubation with 6-hydroxydopamine (2 microM) prevented the formation of lipofuscin in the PC-12 cells. This effect was dose-dependent and was antagonized by the dopamine receptor antagonist sulpiride (5 microM). Bromocriptine also increased the intracellular H₂O₂ and the glutathione (GSH)/oxidized glutathione ratio, protecting cells against peroxide damage. Besides, it increased the activity of the glutamate transporter, which is very important for removing free glutamate and for maintaining the low levels of this excitatory amino acid in the extracellular space. Furthermore, bromocriptine induced a decrease in the activity of lactate dehydrogenase and an increase in the activity of glycogen phosphorylase. These effects, together with the protection against the generation of lipofuscin, suggest that bromocriptine may play a beneficial role in the pathophysiology of the disease and may serve as a lead compound for the development of new treatments. The mental health of army conscripts during mandatory military service in Ethiopia, Thailand and Cambodia: comparing the conclusions of two recent meta-analyses. It has been claimed that military conscription may increase the risk of psychological disorders. The last meta-analysis has been criticised for the poor quality of studies, and for the lack of methodological standards and controls. We re-examined the claim that mental health problems are common during military service. We identified 25 studies, and a total of 6,146 participants, 2,042 of

The Philadelphia Eagles are making the case that quarterback Carson Wentz is no longer only an MVP-caliber quarterback, but also a starter in the NFL's elite class at just 25 years old. In his first practice since undergoing surgery on his left knee, Wentz threw with a clean leg. That comes after multiple reports indicated that he'll be ready to return by the Oct. 22 contest against the New York Giants. The Eagles finished the 2018 regular season with nine wins, the third-most in the league. Philadelphia's defense was impressive and the offense was helped along by Wentz's MVP-caliber play down the stretch. ESPN's John Clayton claimed that Wentz can now be listed in the NFC's top five quarterbacks, joining Drew Brees, Aaron Rodgers, Matt Ryan and Kirk Cousins. Visit NBCNews.com for breaking news, world news, and news about the economy "When you have a quarterback like Carson Wentz, who, given his injuries and the injuries that occur, I can imagine a scenario where you're talking about the MVP, you're talking about your starting quarterback," Doug Pederson said. "That doesn't mean he'll be an MVP at the end of the year, but I'd be surprised if he wasn't near the top. You have to have the right quarterback to be a contender." The Eagles are hoping that Wentz's recovery is quick. He suffered a torn ACL in that same knee during the 2017 campaign and missed the last 11 games of the regular season. In the preseason, Wentz has been tested in the passing game with Philadelphia's new-look offense. He's completed 49 percent of his passes for 571 yards and one touchdown. WASHINGTON (Reuters) - U.S. President Donald Trump on Tuesday said the United States "is far stronger than ever before," and will get better "over a very short period of time." "We have the strongest economy in the history of the world, by far," Trump said in remarks at the U.S. Embassy in London. The U.S. economy grew at its fastest pace in three years last quarter, helped by a booming stock market, a drop in unemployment and robust consumer spending. Trump, who has presided over a stock market rally since he took office in January 2017, cheered the market last week, saying it made him "rich" at a time when "politicians
