  [^1]: Faculty of Mathematics, TU-Berlin [^2]: Faculty of
 Mathematics, TU-Berlin Q: Is it safe to use @media gueries
   for any media-type? I have been reading this And I am
wondering if it is safe to use @media queries for any media-
  type? I mean can I have a @media for the following: 3gp
(QuickTime) video formats audio formats movies in browser
jpeg (JPEG) images png (PNG) images GIF images A: No, it is
 NOT safe to use @media gueries for any media-type. Only
trusted media types can be supported with @media queries
                         (based on

So what can I do to prevent this from happening again, or (hopefully) prevent it from happening for good? A: It is possible to generate self-contained ReadyBoot images. You would just have to disable auto-start for applications and services and manually launch them when starting the PC. For the specific case of Windows Update, you should read this topic: How to disable Windows Update at startup. If you just want to avoid this log file becoming unwieldy, you should put a flag inside it or even better, a configuration file. Last I checked, wuaueng.dll is supposed to be able to spawn events for the System. For example, a Windows XP SP3 ReadyBoot image looks like this: KB988751 ®ÑÙeÊ?uôÇÛʨøb,
