Defrag for Windows requires the following driver:

- To connect the PC to the Internet and obtain necessary files for defragmentation.
- To identify the file system.
- To have a higher hardware performance, more ram capacity and better memory performance.
- Defrag for Windows can not run if you have a virus or malware in your

What's New in the?

1. It is the best defragmenter to defragment 4 different partitions (C:, D:, E: and G:) in a multi-boot Windows XP/2000/NT/2003/Vista machine. You can access these 4 drives while running the defrag tool without any special setting.
2. It enables you to defragment empty space (free space) in each drive.
3. It supports NDIS (minimum of Windows 7 and up).
4. It will automatically run and defragment while you work and sleep, including defragmenting the fragmented files in the D:, E:, C:, G: drive.
5. It makes system rescue.
6. It is the most user-friendly defrag tool. It does not have the complicated interface as many other defragmenter. It only requires few clicks to defragment its target drive.
7. It is the best defragmenter to allow users to change its setting. You can adjust the pace from 2 passes to 4 passes. You can also adjust the defragmentation schedule from None (automatic) to 3, 5, 10 passes daily.
8. It is the most powerful defragmenter to clean useless information, such as TEMP, SYS and BUILD. It also cleans the temporary files.
- 9.

You can assign the target drive to any interface (A:, B:, C:, D:, E:, F:, G:, H:, I:, J:, K:) and external drive (E:, F:, G:, H:, I:, J:, K:). 10. You can schedule it to defragment the target drive when you are not using Windows. You just click the button to schedule it. Limitations: Log into the account first and run the program. It automatically defragment the target drive. You can't change its defragmenting schedule. It is for Windows 7 and up only. For Windows XP users, it is an add-on program. It doesn't allow users to change the schedule. You can only defragment a single drive (root, C:) at a time (i.e., in the Default Mode). You can't select multiple drives to be defragmented at a time (i.e., in the Multi-Drive Mode). You can't use the

System Requirements:

Minimum: OS: Windows 7, Windows 8.1, Windows 10 Processor: Intel Core i5-2400, 2.8GHz / AMD FX-8350, 4.0GHz or better Memory: 4GB RAM Graphics: DirectX 11 DirectX: Version 9.0c Hard Drive: 18 GB available space Additional Notes: SFX uses the .NET Framework 4.6.2.
