What's new in Gamehunt:

A gamehunt is the celebration of game playing. It may be performed individually, or as part of a larger cultural festival. Gamehunts appear in a variety of cultures around the world, including China, Japan, Korea, Finland, Germany, Switzerland, and the United Kingdom. England In England the activity of hunting for animals for pleasure has long been recognized as a privileged activity of country gentlemen. Early survivals include, in Edward de Vere's Oxford manuscripts, a written-out poem about the gamehunt; descriptions of deer in J. H. Walsh's The Romance of the Forest; and references by William Shakespeare (c. 1603–1616) to the hunt and to deer. However, the popularity of deer culling for pleasure and the consequent growth of hunting clubs was a decisive feature of the development of English gentleman sport, culminating in the progressive but selective organization of a European deer-hunting empire in the eighteenth century, which was designated "The British Game." At the root of this whole hunt for the sake of hunting was the royal sport of pheasant hunting; the terminal outcome of the deer hunt was to be a battery of cannon in front of the Tower of London. In writing in

the twenty-first century the historian and biographer John Julius Norwich has stated that "next to fox-hunting it is deer-hunting that is closest to a sporting national institution in England. In no other country do so many people participate. ... It is often said that there is no national sport in England. It looks as if a vital exception is deer-hunting, because on that, at least, the English have an institution that is supported by the nation. In this they show surprising definiteness of character, despite the fact that we might not be very keen on killing deer." Although deer-hunting still is an important part of English life today, to the point where the British Game is overseen by a Board of the English Gamekeepers' Association, it is no longer as strictly regulated as it once was: The point of difference is that today, the British Game is no longer taken entirely seriously, and it has been diminished from its pre-eminant position. Country life in England In nineteenth-century England, as late as 1874, the rural population of England "was a very little above the level of the close till after the Reform Act. Farmers, reduced as they were to agricultural labour, were
