What's new:

Teslagrad is a puzzle video game developed by Swedish indie developer Aneesh Maniar and released digitally on the Xbox One in 2015. The game was released on Microsoft Windows, OS X, iOS, and Android apps in 2015 as well. Two

years later, it was released to Nintendo Switch in 2017. A traditional launch version of the game was released for Windows and Mac in 2016. Gameplay Teslagrad is set in a medieval setting. The titular Teslagrad is a lost and dangerous castle, constructed from an army of turrets. Each round, the player can buy, sell or remove individual turrets and use the leftover money to expand their empire. The player has access to only a portion of the ship in a first-person perspective. Each turret is placed on the ground in a virtual grid, and the player uses the mouse to reach new tiles. They can orbit a tile for added bonuses, or click an empty tile to begin building a new turret. Building new turrets increases the number of the player's available actions in a round. Money earned in an area is spent in another area, and the positions of their units on the ship correspond to how much money they hold. Development Aneesh Maniar, the developer of Teslagrad, is from Pakistan. In the early stages of Teslagrad's development, he was working at Thought Café, an English-language game company in Lahore. In 2013, after several years of working under Thought Café, Maniar quit to return to his studies. Teslagrad was initially released to Steam in 2015. As of March 2017, the game has over 1200 reviews on the platform, giving it a rating of 87.00% on average. Plot The final battle between good and evil takes place in the implacable Realm of Teslagrad, where the old gods rule while the Evil Knights of the Fallen Order stand watch. Here lies the world of Areiea, the "Realm of Truth", where a legend is born... or unleashing an unending nightmare from the past. A new vision emerges that will change everything. Only one will rule its gates: Perfect Arcadia. Cast The player's character is the title of the game, an unnamed young man. He's unnamed except for a single name: Teslagrad. He is only expected to appear in the prologue and ending. In the prologue, the player finds themselves on a burning ship,
