Photoshop is a very powerful program that has incredible potential, but learning how to use it properly takes time and practice. Mastering a computer program takes time and practice — so spend the time and practice. Mastering the basic features of Photoshop In this section, I cover the most important Photoshop tools and commands. Then I show you how to modify text, run commands and work with layers, as well as how to create a custom brush for your needs. Image size Photoshop lets you manipulate images to a certain extent. The larger and more detailed your image is, the longer it takes to work on. You may have different needs for manipulating and editing each image. Because the menus and controls are the same no matter what the size of the image you're working on, here I focus on the options available in the menu as they relate to the size of the image. The Tools menu offers the following options: Basic tools: Use the Basic tools to work on a smaller image, such as a logo or text. Scale tool: This tool makes it easy to magnify or reduce the size of an image. Type tools: Use these tools to create text on a smaller image. These tools use a smaller baseline grid than the baseline grid used for text on larger images, so letter size is controlled. Adjustments panel: Use this panel to make color and density adjustments. Enhance tools: Use these tools to adjust or enhance the overall look of an image. These tools use different methods to apply the look you want to your image. Content-aware tools: Use this tool to remove unwanted elements and move objects from one place to another. Customize tools: Create custom brushes and stamp brushes. Image adjustments panel: Use the Image adjustments panel to apply a tone curve, levels, and color balance. Filters and Presets: Use these options to apply or create presets for the tools that you use most often. You can read more about the basic tools in the "Using the tools in the Toolbox" sidebar. Creating an image Using the tools in the menu, you can create a new image or open an existing one. Here I show you how to open an existing image. Follow these steps to open an image: 1. Select the image you want to work with from the Files panel on the right side of the workspace, and make sure that the image

When it's time to die, normal people typically follow the rites of a religious group or elect a secular authority. But people living in what's known as a sacred forest – a place of mystery and spiritual focus in a large section of Colombia – have elected their own death rituals. Inhabitants of the popular Seminario Bosques – or “Worshiping Treetop Forest” – use their unusual rituals to mourn the end of life, and celebrate their community's religious past. Dressed in white, seminarians walk the log-strewn paths of the ancient, tightly packed forest, on a pilgrimage to their graves. Traditionally, people in Colombia follow religion based on Catholicism. But the forest is one of few places in the country where the residents of the “worshiping treetop forest” – the name given by anthropologists – live a secular lifestyle. After the death of a member of the community, a dozen seminarians carry the body through the forest to a place that has been transformed into a shrine. “They bring the dead to the stone, to the place where they are going to be buried,” said Pantaleón Paillé, a psychologist who has studied Seminario Bosques for decades. In a somber ceremony, the body is wrapped in a white shroud and anointed with the scented oil used for making the holy oils that decorate Catholic churches. Next the seminarians perform a Christian burial ceremony, sprinkling holy water from a canister on the body. Finally, the skeletal remains are laid to rest under a canopy of huge Acacia trees. The residents of Seminario Bosques have told Paillé that they were religiously persecuted by the Spanish colonial period. The name “Seminario Bosques”, in Spanish, means “place of the acacia trees”. “In the name of God, we look for the other part of life,” said Irene Vázquez, a believer in the forest who is leading the way in the traditional funeral procession. The cemetery is located at a height of almost 1,500m on the foothills of the Andes mountains. Only a few villagers can walk to it. Most Colombians are descended from the Catholic Spanish settlers. “And now we are not like the Spanish,
