RadiationIslandfullcrackcrack(1)

Re: Fallout Shelter Extremis Hack [Pros Only] Well, since no one is responding to this thread, I will. So, I know this is a graphics thread, and all. However, based on the title of this thread, I assume that you have looked into making some sort of Fallout Shelter Extreme graphics hack. Are you having problems? Are you getting tired of the game?

Re: Fallout Shelter Extremis Hack [Pros Only] I have never got into extreme Fallout Shelter but if I did I probably wouldn't make a hack for it. I will probably make my normal Fallout Shelter hack instead. Re: Fallout Shelter Extremis Hack [Pros Only] I have played Fallout Shelter since it came out and it is a solid game. It's easy to pick up and play especially for first-timers. I've never tried extreme, but it sounds like it would be different. I can understand why other people would dislike Fallout Shelter and it does have a lot of flaws, mostly, the monotonous timer. On the other hand, the Fallout world

has plenty of gameplay and features. If you want to try some others, I recommend checking out Nuclear Throne and Keep Talking and Nobody Explodes. Edit: I only own two games on steam, fallout shelter and nuclear throne. Last edited by Soren E; 10/20/2013 at 07:41 PM. Reason: Typo correction For the Game Itself, there are a few fixes you could add. For example, there is an addon called "Waypoints" that adds waypoints to your map. But because Bethesda liked the idea of saving points, they didn't include it in the game in the first place. So, you will have to add it for yourself. Also, since you don't need the XL as there is no karmic dimension, you could remove the extra XL monster that is on the roof of the loading screen to save a few quadrillion bytes. Re: Fallout Shelter Extremis Hack [Pros Only] Dude, its been 2 years, you should be all up in the project. Do a video, have it released on your own site, and then post this comment on whatever thread. If you still don't do it, the chances are you never will. Re: Fallout Shelter Extremis Hack [Pros Only] I agree that you should release it 0cc13bf012
