"I am butter" is a clearance game with exquisite catoonish pictures. It will challenge your cleverness and endurance all the time,without repeated battles and defeats, maybe you could not pass the clearance game. Imagine you are incarnated as a small piece of butter in common scenes such as kitchens and fast food restaurants，use your cleverness and endurance to jump to the end step by step! The bottles and cans that can be taken easily at ordinary times have become inaccessible mountains in front of you! Small animals you despise at ordinary times can dominate your destiny here! The food that makes you salivate at ordinary times has become an obstacle to your clearance at this time! -Reach the destination only by direction controlling and jumping over. -Each level seems very simple, but it's not as easy as you think to reach the destination. There will always be unxepected surprises waiting for you on the way! -According to the internal test, the average clearance time is 2 hours and the fastest is 5 minutes. Take the challenge! -Lovelorn? Unemployment? Here are all trifles. Experience the setbacks you have never accepted! -If possible, more handles to be prepared, otherwise, adjust your mindset. -Many different bonus scenes, See how many you can find! Working on: -Other Worlds with Multiplayer -Taking a look back to our best maps -Modify AR and the possibilities for this Mod This Game is a Early Access Game for Steam, for Windows, Xbox, Playstation, Android and iOS! Greetings, I'm doing a Mod for world of VR. I'm here to ask for the basics: - Do you like this mod? - What do you think about it? - Are you a VR player? - What do you think

about it? Let's start a fresh thread for this. This is one that is going to take a little while...EEG Spatiotemporal Spectral Ratio as a Potential Biomarker in Tissue Injury. The purpose of this study was to assess the ability of the full bandwidth (0.5-100 Hz) spectral ratio of scalp electroencephalogram (EEG) in the time and space domains to detect tissue injury (TI) from ischemic and traumatic brain injuries (TBIs). This prospective study included 74 patients (29 ischemic stroke and 9 posttraumatic brain injury (TBI), and 27 controls). Each subject underwent an EEG assessment, where 10 minutes of eyes-closed recording were performed in the time domain. Later, spatial analysis of the preselected raw EEG was done by means of spatial filters implemented into the frequency domain, followed by a ratio (R) calculation. The correlation between values of this R and the volume of loss was computed for each patient. The correlation between cortical loss (to a multiple of the patient's capacity to generate motor movement) and values of the R differed significantly between controls and patients (r = -0.82), with values in TBI (r = -0.87) and stroke (r = -0.74), but not between stroke and controls. The correlation remained significant (p a private server. It's not that I think 4chan will disappear, but I believe they will become more or less irrelevant. c9d1549cdd

Bomb Club Deluxe is the eleventh studio album by the English rock band Oasis, released on 26 June 2011 by RAR!, Columbia, Sony and Cumbria Stylings UK. After the release of Oasis's previous two studio albums, Dig Out Your Soul (2003) and Dig Out Your Soul: No. 2 (2005), the band was taken aback by the large reaction to their return single "The Importance of Being Idle", released on 28 January 2011. Following the success of their comeback single, they began working on what would be their first album in four years, and its release date was delayed as a result. Originally a 50-minute album, it was later reduced to 42 minutes with the addition of the untitled ninth track on the Japanese edition. The album was promoted by four headlining shows in the UK between 17 and 25 June 2011 in addition to several other shows, which were filmed and released on DVD and Blu-ray in early 2012. Bomb Club Deluxe was preceded by its lead single, "The Tradition of Drinking" on 25 March 2011, which became their first number-one single on the UK Singles Chart. The album debuted atop the UK Albums Chart and spawned five singles, all of which charted within the top ten. Four of these singles were eventually certified silver by the British Phonographic Industry. The final single, "Hanging By a Moment", preceded by the music video to promote its release in April 2012, achieved a triple platinum certification in the UK for album shipments of 600,000. Background Oasis released a pair of their most successful albums between 2000 and 2003. The release of their 2002 album, Don't Believe the Truth, achieved phenomenal success for the band, selling over five million units by the end of their initial UK tour and cementing the band's status as one of the biggest rock groups in the world. Two years later, Oasis's third studio album, Dig Out Your Soul, peaked at number one on the UK Albums Chart, later winning a double platinum certification from the British Phonographic Industry for album shipments of 600,000. Following the release of Dig Out Your Soul, the music videos for the British single "Fade Away" and American single "Supersonic" were directed by Anton Corbijn. The band were reportedly exhausted by the pressure to make another album, so two years after the release of Don't Believe the Truth and

You play a young man, a hacker, with a smartphone and a PC in your hand. His mission is to accomplish a certain mission in time. You need to grab a bag from the metro station. It's not easy because as you know, it may be a trap, but if you pass an important checkpoint in time, then it will be considered to be the truth. But everything depends on time, and you need to wait for the train in rush hour. It's not going to be convenient, unless of course you are in great shape. If not, you will be constantly getting tired, the bag will not be grabbed in time and the game will be over. Time Matters So be careful, you need to know the time, and you do not always get a chance to read it on the wall. Unlike the traditional clock, the game does not allow you to manually set the time. The time will be calculated according to your location: Moscow (if you click on the map before you start the game), New York (if you get into the car at the beginning of the game and then click on the map), Paris (when you finish the game in the apartment). You need to make it from Moscow to New York in 4 hours. To make it as fast as possible you need to gather and trade food, alcohol, cigarettes, attract the attention of random people on the street, read all the signs in the game, and pay attention to what the rats say. The food from the local shop will cost you 50 rubles, and you can buy them at convenience stores and on the Internet. The alcohol costs you 100 rubles and cigarettes cost 250 rubles, to which you can add another 100 rubles for a better quality. So you can earn about $ 3000 in a week. You will need to solve this problem at the time-consuming PC, but don't worry, if you calculate it correctly, and the time has just come, all will be done automatically and you will learn a lot of useful information.
