"In 1963, Andy Warhol's first film was screened. Later that year he painted a portrait of Marilyn Monroe. In 1970, he was arrested for possession of eight minutes of film in the USA. And in 1975, he was interviewed for an article in the UK's The Observer newspaper." This book is about that. It's about the occurrences, the artist, and the history of the people involved. Email: techsupport@gadgetpromo.com Managing and expanding your business effectively is not as easy as it seems. The fact is, if you're not paying attention to the minute details, you might find yourself drowning in debt. To start off on the right foot, it pays to understand the intricacies of the business world. It may seem like a no-brainer, but business owners often miss the most basic accounting details. Do you know what the difference is between a cash and equity account? What is the best way to reconcile accounts? Do you use accounts payable to track invoices? Do you need to determine the financial health of your business? If the answers to these questions are "no", stop procrastinating and start learning how to manage the details of your business so you can focus on running it successfully and profitably. The Basics of Accounting With every business, there are always transactions in place. Bills, expenses, and paychecks are the most basic types of transactions, but there are other transactions that come into play as well. Here's a quick look at some of the most common types of transactions: Invoice A customer payment is delivered to an invoice account on the books. In most cases, the payables account has the general ledger (or other corporate books) and the supplier ledger is the location for all items purchased. Inventory This accounts for products and supplies that need to be tracked to determine when the vendor can be billed for the product. These items are not invoiced; instead, they are charged to customer inventory. Cash Book The cash register is where sales and purchases are recorded. This accounts for any cash that

First let's do a break and think about this whole thing. I'm in a very good mood because my "pain" - the part of me that is hurting so much has just been getting better. It got worse for a while and then got better. I've been doing this thing to myself for a while and I'm so glad I'm learning to control it. It really was/is the most exhausting thing ever. I kept waiting for it to be over and yesterday it finally was - I've been in bed all day with my husband watching football and not thinking about much of anything. Just hanging around until he needed me to help him fix something and then it's bed. I got on the machine and finally got out the answer to a question I've been wanting to ask but too scared to ask - the whole story of the "half my body hurts" thing. Here are some of the things I learned. I'm learning to LOVE my pain because it is teaching me so much. I'm feeling really positive about my body. Fibromyalgia pain doesn't just go away. I had heard that "it gets better" but I had no idea how long it took. It will always be there. Even though I've been "better" for a while - I know it will be back again. I'll say that last part again - even though I've been "better" for a while - I know it will be back again. It can make you feel really terrible (obviously). I was really depressed for a while. It's not the way it's supposed to be 3a67dffeec
