After a brief setup process, you get a great software for your photo collections. I can say it is a very useful application for anyone who wants to organize their photos. After a brief and uneventful setup operation that doesn't need special input, you are welcomed by a classical-looking interface that doesn't contain visually appealing elements but it's simple to navigate. Tinker with settings for photo collections It's possible to indicate a source directory whose images you want to take into account for processing, specify the destination, and set the subfolder naming pattern (e.g. year and month). Adebis Photo Sorter lets you form groups (e.g. 1 day, 1 week), include even photos who don't have EXIF information and sort them by file creation time, as well as narrow down the images by setting a date range and by excluding any file types. I am the one who is afraid that there will be a catastrophic increase in the price of the commodities that the Second World War and the famines in Ireland provided for us. I am the one who has written a book which argues that the Irish received a better deal than anyone else. I'm the one who has argued that we have a moral claim to reparations from the countries where we derived our wealth before this country became independent. I'm the one who has asked these questions: "How much for the land taken for the twelfth of July 1916? How much for the land taken for the famine of 1846, 1847, 1848? How much for the land taken for the slaughter of the war? How much for the hundreds of thousands of people who died as a result of potato blight? How much for all of it?" So, if anyone is accusing me of not living in a proper historical context, they are misinforming and misinterpreting my book and its argument. – Bernard O'Brien, April 16, 2013 The book I am referring to is P.S. O'Brien (2004) Do No Harm: Ireland's Moral Dilemma, a wordy title, a wordy book but an excellent and readable and pointed book. – Brian Raftery
