In real-life, these actions are reflected differently, but in the game, the game engine uses the data from the player's movement and also from the player's real-world actions to make the experience more complete. All 22 real-life players will be included in the simulation, and they will be able to use a set of pre-defined animations, which are refined according to their technical and tactical characteristics. For example, famous players like Gareth Bale or Sadio Mane will be able to be controlled with extraordinary precision. Alongside the 22 real-life players, FIFA 22 will also feature a set of 11 Real Player Motion (RPM) animations that are inspired by the best players from the top six European leagues. These RPM animations will be used when players are dribbling and shooting with a similar feeling that real-life players experience. As a result, a player will be able to dodge an opponent with unexpected reflexes and execute a spectacular action with similar skills that you might see in a real-life match. These RPM animations will be adjusted according to the players technical profile and to the action with which they are working, and will offer different moments to the player for choosing the best way to attack a goal or defend a counterattack. Related: FIFA 22 Ultimate Team Features & AI Improvements FIFA 22 will be released on September 27, 2021, and will be available for Windows PC and Xbox One. EA Access and Origin Access subscribers will be able to download the game a week before the retail release. About FIFA 20 In early August 2017, FIFA 20 was released, introducing new ways of experiencing FIFA, including modes inspired by the FIFA 20 World Cup and with a revolutionary format for Ultimate Team. FIFA 20 was a highlight in the FIFA series' history – helping the series achieve the highest player market share and revenue of any entertainment title in history. About the Real Player Motion (RPM) system The Real Player Motion system is an advanced animation system designed to give users a true-to-life experience when replicating the physical aspects of players. The RPM system features highly detailed animations that are generated based on the real-life movements of the players and based on the action of the player. The RPM system can create animation assets for players to interact with the ball, players to intercept the ball or tackle the ball, and animated players

## Features Key:

- My Team - Get to the heart of the game as you customise your squad by using My Team to create, manage and play your very own local team. Create your very own local team and name it how you like.
- Live in the Moment - Make quick decisions in the heat of the moment, then step back and make smarter tactical decisions. Compare your alternatives across the pitch and choose the tactic that will win! Will use your hands and feet to play for the ball, or fight for it? Play the way you want to play and create your own style of play in this and other modes - and even share it with friends.
- Quick Attacking - Tackle moving players and shut down passing lanes. Master the new Team Tactics mechanic - all around the pitch, you'll have a range of new ways to employ your squad and steal key passes. And use your Mo-cap vision to rationally wait for the right moment to play a through ball.
- Put Your Foot On the Ball - Quick defensive reactions will keep your team safe and you in control to perform the type of rapid attacking play that you'll come to expect from a game of FIFA.
- Unique Player Movements - get more out of your touch and know where your teammates are at all times to unlock the most fluid and realistic player movements in the series.
- Ultimate Team Competitive - New Seasons Mode is a competitive spin on Ultimate Team to add some true competition into FUT. This mode includes custom leagues and cups for seasons to come.
- Team Deleted - our famous Team Deleted mode is back, with multiple host options and the ability to delete teams live online so you can play with your friends and sometimes use yours.
- Added New Ways to Pass and Move Through the Tackle - Tackle will now stop you entering the final third, and be followed by a deflected pass, a ground pass through the legs or a smart through ball from either side of the opponent. Smarter passing will be rewarded as you earn more tactics cards. New

## Download Fifa 22

Football and videogames have always gone hand in hand. Because of that, FIFA has been in the business of football for almost three decades, and has consistently created games that have been revolutionary in the world of videogames. FIFA Ultimate Team FIFA Ultimate Team is the mode in which you build and manage your very own football club. The entirety of FIFA 22 features the new Ultimate Team, which allows you to create customisable packs of players, collect them and then use them to participate in online tournaments. Virtual Pro Season Season mode recreates the challenge of trying to win the big trophies. In order to win the Club World Cup, you must start from scratch and build a squad of superstars, from Lionel Messi to Neymar to Cristiano Ronaldo. The mode is also dynamic and offers a dynamic experience, as you progress through the season, the clubs which you play will adapt their tactics to best suit your style of play. Earn more of the key badges as you progress throughout the season to earn a higher level of Champions League and Club World Cup bonus content. EA SPORTS Rivals EA SPORTS Rivals is a new online mode that allows you to play head to head against your friends in a series of knockout matches. In EA SPORTS Rivals, you can take on your friend in one of three modes: Knockouts, Grand Leagues and Leagues. The first time you play against someone, you have to pick a favourite formation and tactic. After that, you can only change formation and tactic when you are defending. Striker partners are easy to swap in and out of. You have the choice of switching from a striker to a midfielder and vice versa or you can use the Tactical Formation button to quickly swap between midfield or defence. It is important to note that the way in which EA SPORTS Rivals is set up, it favours European leagues to American ones. The reason for this is because there is limited time for the leagues in the same country to fit it in, so a global league has more matches. This results in a smaller number of matches for more leagues. Additionally, it is more realistic because it gives an increase in difficulty across the board. For example, in Fifa 16, when you're playing a Champions League match, you only had to focus on the weaker sides in the competition. In EA SPORTS Rivals, you have to compete with the better teams in the respective
