Visual LISP Visual LISP (Visual Basic for Applications) is the AutoCAD Activation Code API which provides a framework for VBA, also known as Visual Basic for Applications. A Visual LISP program may be created using a Visual LISP Builder. The builder will generate a Visual LISP source file for the program. Visual LISP Builder is available as part of AutoCAD or AutoCAD LT. Visual LISP is still supported in Autodesk 2019 but is no longer available for purchase. Visual LISP API allows users to create add-ons to expand the functions of Autodesk products. It is widely used to create parametric design software such as

CADextender, a parametric design extension of AutoCAD, and kBlocks, a parametric design extension of Autocad LT. A Visual LISP program must be compiled to produce an AutoCAD DLL and run inside Autodesk's Visual LISP Builder. The compilation can be done in either Visual LISP or Visual LISP Builder. Visual LISP Builder is used for easier compilation of Visual LISP. A Visual LISP Builder program can be compiled into a Visual LISP.DLL file using Visual LISP Builder and then compiled into an executable file using the Visual LISP Builder - Windows Runtime compiler tool or Visual LISP Builder -.NET compiler tool. The Visual LISP.DLL and the executable file can be developed for both 32-bit and 64-bit computers. Visual LISP Builder -.NET Visual LISP Builder -.NET Visual LISP Builder -.NET is used to compile Visual LISP Builder for Windows Runtime and .NET environment. It is available for Windows 8.1 and Windows 10. It requires Windows Runtime SDK. Visual LISP Builder -.NET is available for installation at the Microsoft Store for Windows 10 version 1607 and later. A: According to the title of this question and this blog post, you're talking about Autodesk FreeCAD 2014, right? There's two approaches: use either the Autodesk FreeCAD 2015 or the Autodesk FreeCAD 2013 (and Autocad LT 2013) as a trial. (I can't find any alternatives.)
