What's New in the WMV To AVI Converter?

I want to have the capability to trace my downloads to the Internet. The easiest way of doing so is to record all individual downloads and play them later, or to create a listing of all visited links and sort out your list by date and time. If you are a Web designer, you know that it's not as easy as it sounds. With the Internet exploding with info about everything, we, as web designers, are overwhelmed with finding the best content on the web. So when it comes to "Tracking Down" websites, we find it easier to copy and paste all of the links we find into a "Notes" field of our browser. You might want to know where you have been on the Internet, i.e. the websites you visited lately. So, here it is: Web List Tracking. Features of Web List Tracking: Extract the links from an Excel spreadsheet Export them to a text file for further use Insert this list as a reference list Web List Tracking is a simple tool for all Web designers wanting to know how to get to a particular page on the web. Take a look at it and send me your comments: Features: *More than 300 links included *Easy to use software *Export to file, email or create new list Web List Tracking is a simple program and can be used to get to a certain website or webpage. It can also be used to modify or create a personal website or webpage. Main features: *Tracks all websites you visit *Design a custom website from scratch *Organize your links into alphabetical and specific categories *Export your website to a text, html, word, pdf or rtf file Web List Tracking is a simple tool for all Web designers wanting to know how to get to a particular page on the web.
