Today I got an Allison MD4000 as a trade in for a used GMC C5 2500 with a 6.7L Cummins Turbo Diesel. Before I get started here is a short video of my 1000 series Allison Transmission. It is also used in a 2013-2017 Dodge Ram 1500 with the 5.7 Hemi. A couple months ago, a friend of mine, Scott, and I were talking about the state of the economy. The obvious source of angst for many Americans was the state of the stock market and the seeming inability of the economy to produce a recovery. The conversation moved on to the burgeoning trend of companies laying off high-skilled white-collar workers. Scott's position was that the nature of the American economy is such that the best and brightest are inclined to place themselves in a privileged position in the labor market. Since it will always be cheaper to hire a new worker and train him than it is to try and retain a current employee, companies find it in their best interests to use their assets as efficiently as possible. Both this observation and the heated political discourse about how "inexorable" the trends of our economy are a result of people like me being unemployed, and how our good paying manufacturing jobs are being shipped overseas. I take Scott's argument. And I am sorry to report that I am one of these workers. But by saying that I am one of them, I get to the other side of the equation. For, if I were an unskilled worker, maybe I wouldn't disagree. However, the people doing the hiring aren't about to give up millions of dollars of profit on the basis that I might be slightly less efficient in generating revenue than they were a few years ago. And besides, as I have stated previously, the return on my labor is much higher than that of a general factory worker. But, let me also state that I am not of the mindset of having a really high opinion of myself. There are many workers who are just as valued and skilled as I am and they don't get paid anywhere near the
