**Japanese Civil War** The Japanese Civil War was fought between the Imperial forces, led by the governments of the three wartime regimes, the Empire of Japan, the Empire of Manchukuo, and the Empire of Korea, and the uprisings led by Shinpei Takagi and the leftist-nationalist coalition in China. The war started with the Battle of Takanawa (26 January 1931), the Battle of Baoding (January 1931), and the Battle of Nanjing (January–February 1932). Japan claimed that it had already regained control of Manchukuo (and therefore Korea) when the Treaty of Portsmouth was signed. The Japanese Civil War is generally understood as having ended in December 1936 after the Battle of Shaoshan, when Japanese forces had defeated the nationalist Kuomintang forces and created the puppet state of Manchukuo. Significant military and political factors in the outcome of the war include the structure and leadership of the Japanese military (which was initially premised on
