The FIFA franchise is one of the most widely renowned sports titles of all time, selling over 200 million copies across the globe since its launch in 1995. In the years since then, FIFA has been the product of extraordinary industry innovation, crafting an award-winning universe that captures the intensity, strategy, emotion, and unparalleled community of the real game of football. FIFA goes deeper and truer than ever before and nothing will ever be the same. The Story The FIFA vision began in 1991 with an initial release of FIFA on the Sony PlayStation. As the first soccer simulation on a console, the game changed the football industry forever by selling over four million copies, sparking a passionate and loyal fan base. Soon, Electronic Arts released a sequel, FIFA 92, which introduced 3D graphics for the first time, and introduced the player's first-ever fall-down animations, allowing for the full body awareness of a true footballing experience. In addition to 3D graphics, 92 introduced two-touch passing and facial expressions, as well as the concept of an offline draft. With such innovations, the game was named the Sports Game of the Year, and sold an unprecedented two million copies on the Nintendo 64. EA Sports was back in the game again on the PlayStation 2 in FIFA 98, introducing thrilling new challenges like cornering and dribbling, as well as an incredible online mode, debuting the now famous "FIFA World" competition. With "99" came back-card play, a revolutionary take on the goalkeeper, and "Off The Ball" action, finally allowing defenders to control the match. Season after season, FIFA has set the gold standard for football simulation, continuously raising the bar of innovation. Each new version of the game has introduced more immersive controls and gameplay, as well as beautiful new animations. The most recent installment in the series, FIFA 17, featured ground-breaking features including hyper-realistic controls and animations, new environments, and real-time crowds. EA Sports is currently in development of a new title in the series, FIFA 18, scheduled to be released in 2017. Powered by Football™ In the years since the original PlayStation release, FIFA has sold over 200 million units across the globe. Due to the success of the franchise, alongside continued innovation, FIFA has become one of the most recognizable sports titles of all time. FIFA has brought the community together in the form of the FIFA World, which has been hailed as
