AutoCAD is available for both Windows and macOS. In the Windows world, AutoCAD is available in two versions - a 32-bit version and a 64-bit version. Both of these versions are installed by default on all Windows computers. Whereas a 32-bit version can only run programs compiled for 32-bit architectures, the 64-bit version can run programs compiled for both 32-bit and 64-bit architectures. AutoCAD apps are installed in C:\Program Files\Autodesk\AutoCAD or the equivalent path for the installation language. AutoCAD desktop app is available for the Mac operating system. It can be installed and updated using the App Store. AutoCAD Web Edition AutoCAD Web Edition is a cloud-based solution that makes it easier for people to work in AutoCAD through a Web browser. In comparison to other web-based solutions such as Google Earth or QGIS, the app allows users to work in the same environment as their desktop app. It also offers the same features as desktop AutoCAD, and can integrate with all the major cloud storage platforms. AutoCAD Web Edition is available on Windows, macOS and Linux. There are two AutoCAD Web apps available. These apps are generally referred to as web apps, although the term is not officially recognized
