A: The solution for me was to use: `UNIX COMMENT=' '` at the top of the rename utility, which removes all content in the target file (i.e. start to end, including spaces) and then strips any line ending (NL) character. I guess the solution should work in windows too and all other OSs, but I haven't tested. A: In Sublime Text (2.1.2) : The solution is a regular expression: Find: "(?How Adaptive Behavior Impacts Education How Adaptive Behavior Impacts Education The relationship between childhood behavior and education outcomes is dynamic and complex. Several well-known studies over the past two decades, including the 2011 movie "The Blind Side" and 2013 book "The Gift of Fear," have portrayed the complicated relationship between students' behavior and their success in school. In this chapter, we take an overview of
